

- Use Mozilla Firefox for your Internet search engine.
- Use Windows Defender.
- Keep antivirus up-to-date.
- Avoid music lyrics sites.
- Do not click on advertisements, especially ones that tell you your computer is not working well or offer any types of anti-spyware software.
- Avoid downloading software and games from the Internet. Embedded games are *usually* OK.
- Avoid illegal file-swapping sites including LimeWire. iTunes and Napster are OK.
- Have Tech Guru maintain your computer regularly.
- Contact Tech Guru at the first signs of trouble. Problems can usually be solved remotely, quickly and easily.
